I am a recent BIM graduate with a strong foundation in both technical and managerial courses. During my studies, I worked on various projects that enhanced my analytical and problem-solving skills. Now, I aspire to excel in business administration, where I can leverage my unique blend of technical expertise and managerial knowledge to contribute effectively to organizational growth and strategic decision-making.

OBJECTIVE

To apply and expand my interdisciplinary knowledge in technology and business by actively engaging in innovative projects, collaborative environments, and real-world problem-solving, with the aim of contributing meaningfully to organizational growth and strategic development.

EDUCATION

Masters in Business Administration

Kirtipur, Kathmandu

School of Management Tribhuvan University

2024-2026

Pursuing an MBA with a focus on developing strategic managerial skills, data analytics and interpretation, leadership, and decision-making. The program emphasizes sustainable business practices, innovation, and the integration of analytical tools to solve real-world business problems. It aims to build strong foundations in strategic planning, organizational management, and critical thinking to prepare for leadership roles in diverse industries.

Bachelor of Information Management (CGPA: 3.56/4)

Dhangadhi, Kailali

Tribhuvan University

2019-2024

I pursued a Bachelor's in Information Management (BIM), a program combining Information Technology and Management. Through this program, I gained skills in software development, database management, IoT, project planning, and managerial expertise, fostering leadership, analytical capabilities, and the ability to effectively integrate IT solutions into business operations.

Intermediate Education (CGPA: 2.56/4)

Dhangadhi, Kailali

National Examinations Board

2019

Studied Science at the intermediate level, gaining foundational knowledge in scientific principles and insights into various technological concepts.

PROFESSIONAL EXPERIENCE

PHP and WordPress Developer Intern

Blackboard Nepal Pvt. Ltd., Dhangadhi

February 2024 – April 2024

- Led the development of PHP modules for a new business system at Blackboard Nepal, ensuring client requirements were met.
- Managed a team, communicated with clients, and collaborated with senior developers to deliver quality results.
- Worked with marketing to align project outcomes with client expectations and market trends.
- Delivered project demos, showcasing progress and ensuring client satisfaction.
- Gained valuable leadership, project management, communication, and marketing insights.

PROJECT EXPERIENCE

Adhunik Krishi

- **Role:** Developer
- **Description:** Developed a business model through extensive market research, aimed at bridging the gap between traditional and modern farming practices. The project involved creating a prototype that integrates modern farming techniques with traditional methods, enhancing productivity and sustainability.
- **Key Achievements:**
 - Conducted detailed market research to identify pain points in current farming methods.
 - Designed and tested a functional prototype that aimed to improve farming output.
 - Focused on creating a business model to drive adoption among farmers.

Smart Waste Management

- **Role:** Team Leader
- **Description:** Lead a team to create a hardware-based model of a smart dustbin using sensors for waste monitoring. The project involved conducting a market survey to understand user needs and evaluate the potential for a new product startup.
- **Key Achievements:**
 - Managed the team in designing the smart dustbin prototype using sensor technology.
 - Nominated as a top 4 nominee from Sudurpaschim Province in a national-level event, "Living with ICT".

- Explored product-market fit for a sustainable waste management solution.

Nepal eNotes

- **Role:** Mobile App Developer
- **Description:** Developed a mobile application using Flutter, aimed at providing students with easy access to educational notes. Additionally, the app integrated data analytics to derive insights from student usage patterns.
- **Key Achievements:**
 - Designed and developed the mobile app, making educational resources more accessible to students.

Developing Customized Websites

- **Role:** Team Leader & Web Developer
- **Description:** Lead a team during intern to design and develop customized websites for clients, focusing on their specific needs and business goals.
- **Key Achievements:**
 - Delivered tailor-made website solutions for various businesses, optimizing user interaction and functionality.
 - Managed project timelines, client communication, and ensured client satisfaction with end products.

SKILLS

- **Technical Skills:** PHP, MySQL, WordPress, Python, LangChain, Software Development
- **Business Skills:** Project Management, Data Analysis, Strategic Planning, Business Model Development
- **Leadership Skills:** Team Management, Communication, Decision-Making, Conflict Resolution
- **Analytical Skills:** Problem-Solving, Market Research, Data-Driven Insights
- **Interpersonal Skills:** Collaboration, Client Relations, Time Management, Pitching Ideas, Storytelling

CERTIFICATIONS AND TRAININGS

- **Cognizant AI Virtual Experience** (Forage)
Conducted exploratory data analysis and developed a machine learning model, enhancing business decision-making with data insights.
- **Accenture Data Analytics & Visualization Simulation** (Forage)
Analyzed datasets to uncover content trends and presented strategic insights, strengthening data-driven decision-making skills.

- **JPMorgan Chase & Co. Software Engineering Simulation** (Forage)
Worked with stock price data and JPMorgan frameworks, gaining practical experience in financial data applications.
- **Data Visualization with Plotly** (Coursera)
Developed interactive visualizations to effectively convey data insights, enhancing communication of complex data to stakeholders.
- **Python 101 for Data Science** (IBM & Cognitive Class)
Strengthened Python skills for data science, preparing for data-driven business solutions.
- **Big Data 101** (IBM & Cognitive Class)
Gained insights into Big Data processing, applying it to strategic business decision-making.

Extracurricular Activities

- **Advisor, BIM Batch at SPC**
 - Assist seminars, projects, and bootcamps under the guidance of the Head of Department.
 - Actively contributed to organizing and assisting in academic events, including hackathons, Idea Tank, and college fests.
- **Sports Participation**
 - Actively participated in futsal and cricket, promoting teamwork, sportsmanship, and physical fitness.
- **Member, SOMTU Entrepreneurship Club**
 - Engaged in entrepreneurial activities and events to gain first hand exposure to startup ecosystems. Built connections with peers and mentors, participated in various projects, and enhanced understanding of innovation and business creation processes.

Achievements and Awards

- **Smart and Disciplined Student**
Awarded by Sudur Paschimanchal Campus, BIM 2019 Batch, for academic excellence and discipline.
- **Top 4 in Startup and Idea Fest 2022**
Led the team to the top 4 in the national-level event, with the "Smart Dustbin" project, organized by Living with ICT.
